

By Chetana Pawar

The journey started towards AP from all around the world  
With adventurous, hopeful and beautiful souls

Beginning with the quiet sessions which bring in reflections  
We were slowly moving towards more constructive transformations

As we proceed to understand self and others  
We took into consideration responsibilities & expectations

Theories, models, stories and examples  
Expanded our knowledge beyond the horizons

Our ideal, theoretical, practical & conceptual world  
Intensive simulations revealed the 'Real' world

To come out of something we need to pass through it  
Trauma healing sessions channelized it

Building peace is more complex than it seems  
And still go for it because that's how it is

Good or bad, every story has an end  
The sun is always waiting for us on the other end

Share the words, share the knowledge  
Together we can achieve beyond our courage

Never forget the grounds, where you have come from  
Help others to bring their dreams to a real form

Building the trust, caring for others; learning it through drama  
Sometimes in life we need to put a comma

No matter how much we wish, time never stops  
I think it's a great example that the show must go on
